

# Homework 6

There is no physical homework to turn in this week, but your assignment is to download and configure Docker to be ready for next week's lecture.

1. Install docker. [Mac instructions here](#). [Windows instructions with WSL backend](#).
2. Sign up for a (docker hub account)[<https://hub.docker.com/>].
3. Confirm that your docker install is working properly by executing the following code at the command line.

```
docker run hello-world
```

4. Pull the following images before class: `ubuntu`, `rocker/rstudio` by executing the following code at the command line.

```
docker pull ubuntu
docker pull rocker/rstudio
```
